**16-20kW<sup>†</sup>**

Protect your home and family from power outages with Briggs & Stratton 16-20kW<sup>†</sup> home generator systems. Perfect for medium-to-large homes, we provide you with reliable power and flexible options to meet your home's power needs.

Briggs & Stratton has been providing reliable engine power for more than 100 years. Trust the proven power experts at Briggs & Stratton for complete peace of mind.

PERMANENT PROTECTION FROM A PROVEN PERFORMER

Flexible Placement\* - Tested against tough National Fire Protection Agency standards, Briggs & Stratton 16kW† and 20kW† standby generators can be placed as close as 18" from the home providing more placement options in your yard - perfect for tight lot lines.

Reliable Engine Power - Our standby generators are powered by commercial-grade Vanguard™ engines that are design-engineered to dependably take on the most demanding jobs.

Power Solution Options - Choose between an Essential Power-Plus! system that powers a select number of circuits plus 2 air conditioners or a Managed Whole House Power system that powers all of your household appliances plus up to 2 air conditioners with our patented Load Control Center.

Durable Enclosure - Rust-resistant, Galvanneal steel enclosures are made from the same materials and paint process used in the automotive industry, resulting in years of protection against chips and abrasions.

Quick Response - Automatically powers your home in seconds after sensing a power outage.

4 Year Limited Parts and Labor Warranty\*\* - At Briggs & Stratton, we stand behind our warranty and make it easy for our customers to work with us.

Not for Prime Power or use where standby systems are legally required, for serious life safety or health hazards, or where lack of power hampers rescue of fire-fighting operations.

\* Installations must strictly comply with all applicable codes, industry standards, laws, regulations and provided installation manual. Running engines give off carbon monoxide, an odorless, colorless, poisonous gas so it is important to keep exhaust gas away from any windows, doors, ventilation intakes or crawl spaces. The installation manual contains specific instructions related to generator placement in addition to NFPA 37, including the requirement that carbon monoxide detectors be installed and maintained in your home
